-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

BASIS FOR REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

REJECTION OF CLAIMS OVER PRIOR ART

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kutschker (5,927,135). See Figure 3 where the tool assembly 30, which comprises a tool part 34, 54 of multiple segments, is moved by means of a bending tool drive (automatically driven by control 148) and is constructed to "permit ready variation of the number of segment so connected and thereby the operative length of the movable tool part".

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kutschker (5,927,135). Kutschker illustrates the bending tool as treated supra but does not provide at least one cutting device. It is well known in this particular art to assemble a bending brake and cutting implement within the manufacturing plant to cut and bend sheet material to required specification. Accordingly, it would have been obvious to the skilled artisan at the time of the

Art Unit: 3725

invention to have modified Kutschker's bending brake by placing the bending brake within a manufacturing plant having cutting implements for the noted motivation.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by MacGregor (5,067,340). See Figure 5 where a multiplicity of adjacent segments 36 are disposed along the direction of the bending line and are operably connected to the bending drive 34. See also column 2, lines 42-53.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over MacGregor (5,067,340). MacGregor illustrates the bending tool as treated supra but does not provide at least one cutting device. It is well known in this particular art to assemble a bending brake and cutting implement within a manufacturing plant to cut and bend sheet material to required specification. Accordingly, it would have been obvious to the skilled artisan at the time of the invention to have modified MacGregor's bending brake by placing the bending brake within a manufacturing plant having cutting implements for the noted motivation.

INDICATON OF ALLOWABLE SUBJECT MATTER

Claims 2-9 and 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).

INQUIRIES

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner D. Crane whose telephone number is (571) 272-4516. The examiner's office hours are 6:30AM-5:00PM, Tuesday through Friday. The examiner's supervisor, Mr. Derris Banks, can be reached at (571-272-4419).
